

# OH&S DATA

THAT WORKS FOR YOU.

Occupational health & safety software developed by OH&S professionals with real world experience.

Medgate's Health and Safety (OHS) software is a total occupational health, safety, and productivity solution that can be configured to meet any company's OHS needs.

The product may be used as an integrated, enterprise-wide occupational health and safety system or individually as standalone suites or modules. Available in multiple languages, Medgate's software is used across the globe in hundreds of the best known corporations and government entities.

The Medgate software has 4 core product suites to cater to the four main functional areas in Health and Safety:

- ◆ Occupational Health
- ◆ Safety
- ◆ Industrial Hygiene
- ◆ Environmental

“ Medgate has provided us with a holistic approach that was lacking across the organisation and will enable Medical, Safety, and Occupational Hygiene to collaborate effectively together.

Director of Occupational Hygiene, Global Operations  
Fortune 500 Pharmaceutical Co.

## In the Cloud: Benefits of a Medgate Hosted Solution

- Gain insights into OH&S trends and problem areas to improve worker safety, health, and productivity
- Streamline and standardize processes across sites, business units and countries
- Manage and simplify compliance to local, federal, and corporate requirements
- Allow your OH&S departments to work more productively and effectively
